

nobil

Your Business Partner

From Past to Future

Nobil is a joint venture company of Nobil Bilişim and Nobil Technology. We started our journey in 2009 with aftersales services, computer repairs, spare parts and on-site services.

Due to higher demand we expanded our services with consultancy services, product supplies and software sales.

Over 20 years of experience in the market and more than 13 years of experience under the Nobil brand allow us to create Nobil Technology Limited in order to provide better corporate service.

Within this period we provided corporate services over 1200 corporations as well as served thousands of unique clients.

The Team

We believe that quality and long-term team are indispensable behind the right and high quality solutions.

That's why we carefully select all our stakeholders and solution partners, as well as our service personnel and consultants. We value long-term relationships and cooperation.

Workflow

timeline

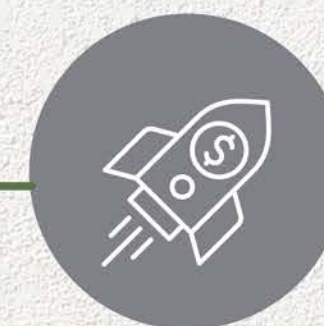

Analyse client's problems

Receive request from the client

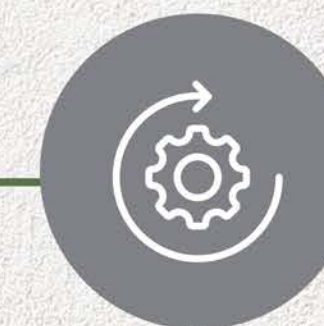

Research the best solution

Examining the problem and offering the solution

Fast, Efficient & Effective action

Taking action on a timely manner

Premium after-sales support

Continuous improvements and long term satisfaction

Project planning

Initiation

What is required to put the project into action ?

Planning

Who is involved ?
What are the milestones ?
How will success be measured ?
What are the risks ?

Review

What went well in the project ?
What didn't go well ?
How can the process be improved ?

Execution

What is getting done ?

Management

How is the progress ?
What information or data are there to report ?

We include our customers in every step by making the planning of all our projects through advanced software and applications.

Our planning processes are carried out transparently and fluently.

These stages, which seem long and complicated, are reduced to the simplest with the instruments we use, leaving no room for delays and surprises.

Services

we offer

1

Consulting, supplying and selling all infrastructure, equipment (servers, computers, tablets, mobile devices, accessories, industrial equipment) that a business or individual may need.

2

Corporate remote support, regular maintenance services, disaster recovery, cloud architecture, cloud migration, modernization.

3

Proposing the right project with the carefully selected products which full-fill long-term needs of the client.

4

Corporate software development, web and web3 projects, intranet, annual reports, newsletter design and send-out projects, ai based software development, mobile app development, integrations and migrations to cloud and platforms.

5

After-sales support, repair and spare parts supply for all servers, computers, mobile devices and industrial products.

Ethics

compliance culture

We stay true to our mission and core values, encourage open communication and honest feedback, creating an environment in which everyone can say and do the right thing.

The working group plans to share information and practical examples and prepare educational content and a guidebook through the projects.
